

Blaze

CITATION

Benefits

Prevents loss of data with automatic wireless synchronization

Automatically queries Federal and State databases and notifies dispatch of any warrants and/or stolen vehicles

Saves money by augmenting existing databases and avoiding costly system modifications

Enhances revenue streams by making field officers more productive

Save time, expand capabilities, and avoid loss of valuable data.

DropFire Inc.'s wirelessly-enabled mobile handheld device software can be used to modernize your municipality's parking ticket system, while conveniently integrating with existing databases. With an easy-to-use interface, automatic synchronization of data, and the power of remote database access, BLAZE™ Citation is the obvious choice for any parking control officer looking to save time, expand capabilities, and avoid loss of valuable data.

Features

- User-friendly program interface contains dropdown menus and fields for citation specific data and comments.
- Tickets can be printed with either a holster printer carried on the hip utilizing blue tooth technology (an advanced wireless protocol) or attached to the device itself.
- Compatible with any windows based handheld device.
- Customizable to work with any database (accounting and/or records management).
- Adaptable to leverage existing wireless infrastructure.
